SKILLS & EXPERIENCES

COMMUNICATION & LEADERSHIP

Ability to align to strategic organisation and project goals, creating a collaborative and engaging work environment, develop and maintain productive working relationship with colleagues, clients, industry participant and diverse stakeholders

Capability to develop vision, cross-functional collaboration, process, and direction to scope, develop, implement projects that achieve desirable outcome.

CREATIVITY AND RESILIENCE

Working knowledge of contemporary and sustainable design principles, forward thinking and creative problem-solving state of mind to achieve best practice, sustainability and integrative design.

- High quality design concepts, with attention to detail to provide a sensory experience to user connectivity with their environment.
- Use research, design proposal and process to demonstrate innovative and sustainable opportunities and support improvement in complex urban design and building form challenges: Water Resilience, Circular economy, Clean site and clean energy.
- Design integration and planning coordination, development and advices: Pluri-disciplinary approach, research and collaborative work to develop strategy, plans and proposal to inform objectives and deliverables.
- Project management in construction from brief to completion and sustainable consultancy for clients and designers.
- Master planning, urban planning, mixed use building (office, commercial, residential), multi residential, mid-rise apartment blocks, residential and commercial building.

THRIVE FOR INNOVATION AND EXCELLENCE

- Peer reviews, policy review and design consultancy within governmental agency.
- Expertise in building technology and passive design to achieve energy efficiency in the built environment: Insulation, Airtightness, Condensation management and Thermal bridging (detailing and modelling WUFI). NatHers, PassivHaus Standard, BBC performance completions.
- Specialist in wood construction (CLT, prefabrication and traditional)
- Education: studio tutoring, lectures, webinar, community events and workshops presentation (cf. Adelaide University)
- Design development of a wholistic approach of urban design (Culture + WSUD + BSUD), ESD and AEU (environmental approach of urban design).
- See portfolio for further details: <https://geraldinepetit3.wixsite.com/website>

PROFESSIONAL EXPERIENCE
